

HOW TO REPAINT DOORS WITH AURA GRAND ENTRANCE®

1 Remove accents.
Protect hardware from drips and leaks.

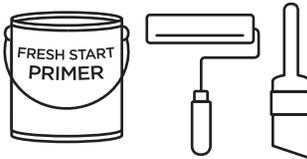

2 Clean the surface.
Remove any loose dirt or mildew.

3 Scrape and sand away paint. Focus on old drips or chips that make the surface uneven. Sand down the surface with the right grit sandpaper.

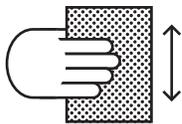

4 Tape off the surface.
Prevent drips and splatters on seams and remaining hardware.

5 Prime your door.
Use Fresh Start® Primer to create the ideal base surface for the new paint.

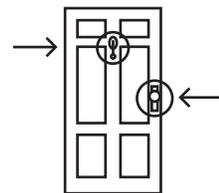

6 Apply the first coat. Cut in nooks and trim with an angled brush. Use a roller for flat surfaces. Let the paint dry for 24 hours.

7 Sand lightly. Use 220-grit sandpaper to smooth out the surface.

8 Apply second coat.
Fully cover the door for the best coverage and finish. Let the paint dry for 24 hours.

9 Reinstall the hardware.
